 ANTHONY R. ZEULI, ESQ.
 Merchant & Gould
 (Minneapolis, Minnesota)

 Counsel for Defendant

1 art was contemplating that this roller might, for example,
2 not extend to one edge of the rotary cutting deck, and
3 extend perhaps a little further beyond the rotary cutting
4 deck.

5 That's just one example. What I would like to
6 show Your Honor now, if we could go to Claim 10 of the '311
7 patent, this limitation was described with respect to the
8 rotary cutting deck. But it also was described with respect
9 to the roller and the cutting path. I think this is going
10 to be very illustrative, Your Honor.

11 Claim 10 of the '311 patent specifically, you
12 will see the very last, said roller, last element, last
13 fragment, said roller extending substantially across the
14 entire width of said cutting path. The cutting path is
15 obviously the path that is created when the blade cuts the
16 grass.

17 If we could go back to Figure 3 again. What I
18 have done here, Your Honor, is you will note the blade is
19 the dashed line that is illustrated under the cutting deck.
20 I have taken where the end of that blade is and I have
21 superimposed a red circle. That would be the diameter of
22 the cutting path. And again, the green lines here are where
23 the blue lines were positioned in the prior figure, that is
24 illustrating the ends of the roller. Now I am going to
25 remove the figure again.
